

ADVENTURE  
TOURS

# Terra Nova Enduro Dual Sport Tour October 16, 2011

You will have the opportunity to not only enjoy the autumn scenery, doing what you like most, but nearing the end of your GPS route, your spectator point will be the Terra Nova Enduro special test. This section of the enduro route separates the men from the boys and is utilized in the event of a tie breaker situation. This enduro is one of the most exciting national enduros on the circuit. The best riders in Ontario and Quebec attend this event and it is the last enduro in the series which makes the points important and the competition fierce.

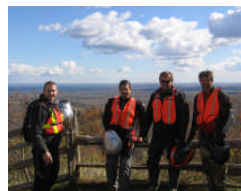

You do not want to miss your chance to see these very talented riders, while enjoying your own ride of 290 km through beautiful southern Ontario at the most colourful time of year.

As usual, there will be an aggressive course and a separate road tour course. The event will start after watching the launch of the Terra Nova Enduro competitors. Throughout the day you will experience elevation changes of approximately 1000ft. The lunch stop will be in Markdale. This is an all-day adventure for both aggressive and casual riders, and a great way to enjoy the autumn colours from either inside the forests or from the low traffic back roads. The support truck and sweep riders will meet up with you throughout the full day ride to ensure your ride is running smoothly.
